I highly suspect this type of behavior is promoted to the unbalanced in society to create the atmosphere that serves a political agenda....a radical left wing agenda.

Once again a dangerous situation for the police officers and the critical moment they had to act for the safety of others and themselves... If the criminal would not have disobeyed the order to drop his weapon and instead charged at them with the knife, it could have ended differently.

Why would someone not drop their weapon? The answer is simple... because they have intentions of using it. ...

So you're just going let a knife wielding man come at you and do nothing?

It was a different city under Frank Rizzoli. The decent hard working Black community respected him, called the young tough "jitterbugs" Beatings by police were common but killing was not. Indecision and political correctness poisoned the well. Observe Wilson Goode and the Move debacle. And now with the Philadelphia DA picked and paid for by George Soros it's reached a critical point. Never has there been so important an election. President Trump's demeanor is irrelevant. And we need to retain the Senate and take back the House of Representatives. I encourage those on the fence to consider the character of those who stand with President Trump in his Administration. They know him personally. He's given up his golden years for his children's future and ours. Let us unite behind this important crusade because our children are all we really are.

So I guess the people would rather let this nut with knife stab and kill the cop. How about a protest for following simple instructions to drop the weapon! Or we can call it Man the F up. Every protest starts with a criminal braking the law and not taking Responsibility for their actions or who can't follow simple instructions ! This World is Shit because the people make it this way. stop braking the laws!
