Local citizen of West Bethlehem, Sarah Andrew.

Gadfly-

I do not know the better way to get comments to you — email you or comment on the blog post? Anyway, I want to know about the compost center. A worker there told me his boss said they are working that day, which seems crazy.

Also I get all of my mulch and compost from there, but won't it be (even more) toxic afterwards and possibly not safe for us to use to grow food? Or touch?

I'm now convinced it's not best practice to take my small children to watch from Nitschmann.

Sarah
