

“Why not just say what was in the dust not what wasn’t in the dust?” (71)

The Bethlehem Gadfly Martin Tower, Serious Issues June 22, 2019

(71st in a series on Martin Tower)

George Lopez is retired after working twenty years with the Environmental Protection Agency (EPA).

Gadfly:

Oh Geez. They didn’t even test for respirable silica which is what caused thousands of horrible cancer deaths after the collapse of the WTC. As for the “However, two air samples for asbestos content could not be analyzed due to overloading of particulate.” Overloading is why they didn’t have air monitoring reports for the “8,000” other projects they imploded. Why not just say what was in the dust not what wasn’t in the dust?

George
