

The virus is living next door to the Gadfly

The Bethlehem Gadfly coronavirus December 11, 2020

video

Excellent story and video on how the virus spreads, even with masks on.

Gadfly just learned the family living across the wall from him as well as their extended family are all infected.

14 of them.

No one in hospital.

One has pneumonia, one is on the verge of pneumonia, one is not “bouncing back” well.

The others suffer coughs, fatigue, and various etcetera but seem to be responding satisfactorily.

They didn't tell us, learned by accident.

They were all together across the wall Thanksgiving.

Stay Safe.

Help keep others safe.
