

Hohlich, Carl G.

**Pfc. Carl Hohlich
With Unit Setting
Up Water Stops**

Water purifying points are being set up in key stops for American troops returning from Southern Germany in what will be the biggest job yet tackled by the 518th Engineer Water Supply Company, of which Pfc. Carl G. Hohlich, 408 West North Street, is a member.

Pfc. Hohlich is a veteran whose company has supplied 25,000,000 gallons of portable water to soldiers throughout Africa, France and Germany. The 518th are Army-trained specialists in water chemistry. They were the first water supply unit to be organized in this war at Camp Livingston, La.

The next operation is expected to exceed any accomplished throughout the European war, it was announced today by Continental Advance Section Headquarters.
