- Broad St. has lived up to its name
- talked about east side when visiting the Food Co-Op new location
- need to narrow Broad St.
- make it more walkable
- West Broad — built for cars not people
- like a river between two different parts of the West side
- could be even more beautiful if Broad St. were the kind of street you wanted to walk on
- how do we narrow that street, slow down the cars
- infrastructure that will lead people to want to be part of Broad St.
- now the further you get away from Broad St the calmer it becomes
- will take a while to do
- need master plan
- then show momentum every year
- a block or two a year, etc, — whatever you can
- underutilized asset — beautiful churches, houses, etc.

- you don't feel them when you are walking around
- definitely a priority going forward
