Gadfly alert! If you are interested in health concerns relating to the MT implosion. There was a meeting today at 3 for “stakeholders” — people and businesses in close radius to MT. There was almost no awareness in the audience of any health concern. And everything rosy from the developer and demolition people. I ‘m posting here an audio of my questions about “dust” — unfortunately the first part was cut off. If you have health concerns listen beforehand and then come to the meeting. But, in any event, come and ask and ask and ask till you feel you have resolution of the concerns.
